DETAILED ACTION

This office action is a response to the restriction requirement filed on 4/5/04.

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, Claims 1-5 and 8-15, drawn to a method for manufacturing an electromechanical sensor, classified in class 29, subclass 595.

Group II, Claims 6, 7 and 16-30, drawn to an electromechanical sensor element, classified in class 73, subclass 774.

2. The inventions listed as Groups I and II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Group I has a special technical feature of cutting or removing processes.

Group II has a special technical feature of an electromechanical sensor element.

Art Unit: 3729

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. If applicant elects Group I, then:

Group III. Claims 1-5, drawn to a method for manufacturing an electromechanical sensor, classified in class 29, subclass 595.

Group IV. Claims 8-15, drawn to a method for manufacturing an electromechanical sensor, classified in class 29, subclass 605.

Group III has a special technical feature of the signal electrode consists of a repeated electrode pattern and partially connecting the patterns together via one or more narrow connecting strips.

Group IV has a special technical feature of removing the metallic matter from the areas outside the pattern by etching. See MPEP § 806.05(d).

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Paul D Kim whose telephone number is 703-308-8356.
